

momac – YOUR TRUSTY PARTNER

## MOMAC – COMPETENT AND RELIABLE

momac is one of the leading companies when it comes to the maintenance, construction and reconstruction of machinery and plants.

With our highly qualified employees and comprehensive machinery, we are able to realise solutions of the highest standard.

Our aim is to offer each customer the most cost-effective solution for their particular needs.

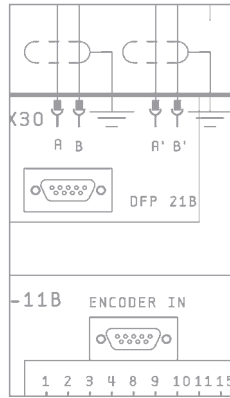

We achieve this by relying not only on our experience, but also on constant further development.

This allows us to offer you comprehensive support for the optimisation and operation of your machinery and plants – and hence actively contribute to the success of your company.

We are as flexible as your orders require us to be: constructional modifications are still possible at the manufacturing stage, and rapid response times are standard practice.

With our combination of technical expertise, decades of experience and strong focus on the needs of our customers, we are able to offer professional, reliable and cost effective solutions for even the most specialised and challenging requirements, and all from a single source.

## BUSINESS DIVISIONS

### Maintenance

Professional, flexible and manufacturer-independent: Organisation and equipment geared towards maintenance work combined with our solid technical expertise allows us to guarantee the highest possible availability for your machinery and plant.

Our maintenance engineer capabilities range from fault risk analyses and recommendations for improvement right up to adaptation design.

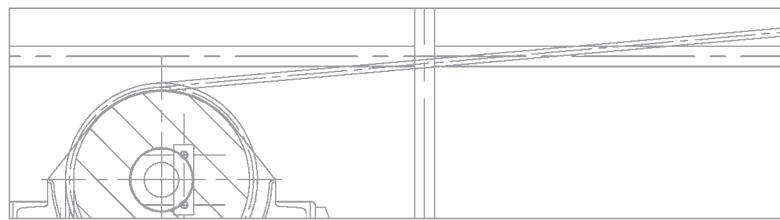

With our modular maintenance concept (mmc), we are able to offer a maintenance program that is optimally tuned to your requirements.

### New and rebuild

High quality and high performance: as your partner in the provision of new and rebuild machinery and plants, we are able to cover all aspects of a comprehensive design, construction and implementation.

Our services range from basic engineering – including cost management – and the preparation of the design and workshop drawings all the way to manufacture, installation and commissioning.

## AREAS OF EXPERTISE

### Special machine building

Where standard systems are no longer up to the job, we develop individually tailored machines and plants for you. We are your competent partner for design, construction, manufacture and commissioning. Take advantage of our sometimes unconventional but always ingenious solutions.

### Contract Manufacture

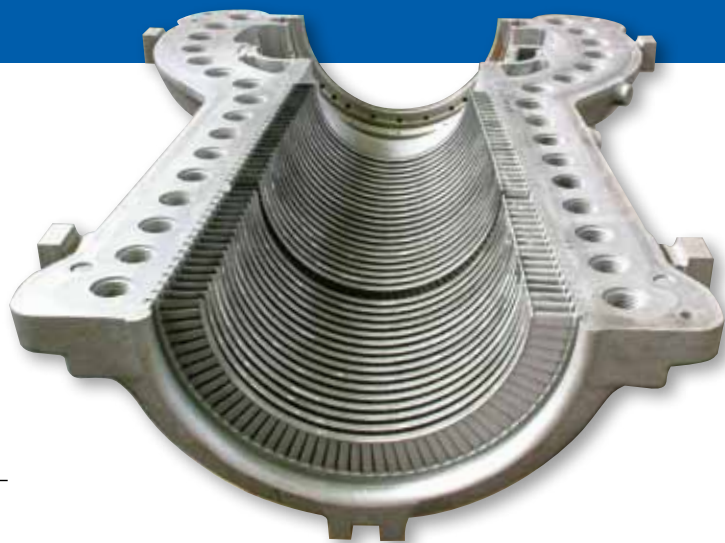

Our versatile and well-matched pool of (large) machinery guarantees constant high quality and short delivery times – for machining work, individual parts and small batches as well as complete machines built to your drawings.

### Gearboxes

Make use of our expertise for maintenance, inspection and repair as well as for identification and remedy of weak points. In addition, with our "Gear Protect Program," we are able to offer you a maintenance package that can be specially tuned to your requirements.

### Hydraulics

For your cylinder and hydraulic systems, we offer you services covering all aspects of manufacture, repair and optimisation – including on-site servicing, supply of individual and replacement parts, vertical honing up to L = 9,000 mm and the design and fabrication of special cylinders.

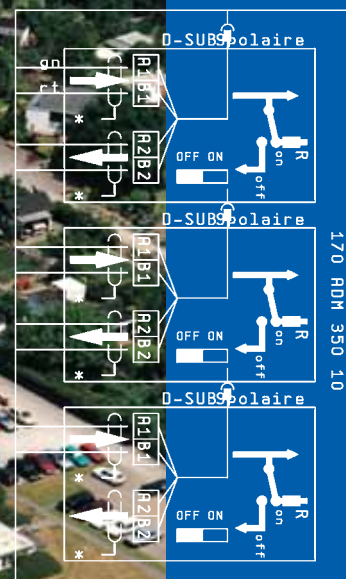

### Electrical and Automation Technology

Our flexible and individual solutions provide you with clear competitive advantages. In accordance with your wishes, we supervise, coordinate and deliver partial or complete systems. You define your particular requirements; we offer you an individual solution suited to your needs and put it into practice.

### Electrical machines engineering

With our comprehensive technical facilities – which include a vacuum pressure impregnation system, large balancing machines and a high-capacity test bay – we are not only able to repair your defective electrical machines promptly, but also supply new, replica and rebuilt custom machines.

## MATURE BUSINESS

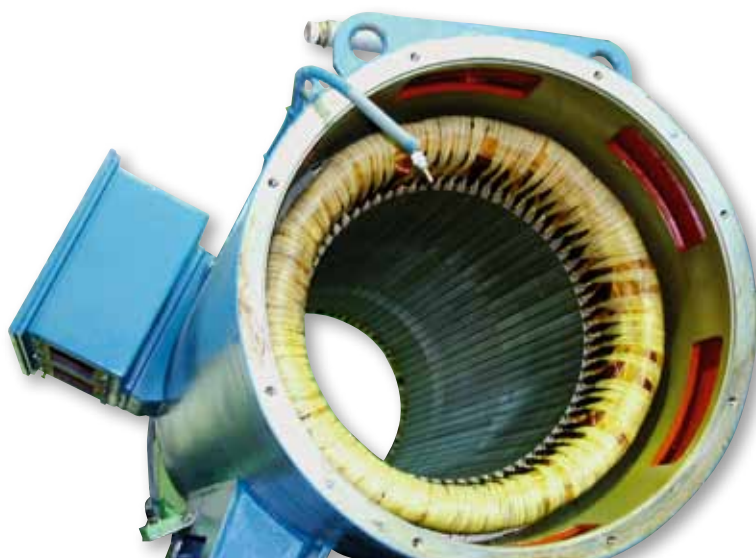

Our roots go back to 1919, the founding year of our parent company, Elektrizitäts-Gesellschaft (electricity company) Lau.

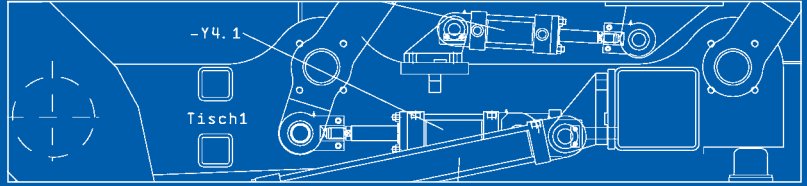

In 1969, the mechanical workshop was hived off as momac Gesellschaft für Maschinenbau (machine building company).

In 2002, the electromechanical engineering division was transferred from Elektrizitätsgesellschaft Lau to egm-Elektrotechnik GmbH.

Today, momac and egm work together as a competent partners under one roof and one management.

momac – solutions from a single source.
